Professional Profile

Over the past four years, I've worked as a Full Stack Developer, gaining proficiency in Laravel, JavaScript, PHP, and SQL, while developing experience in JavaScript frameworks, version control, testing, site hosting and deployment.

I began my career in the banking industry before moving into the Probation Service, progressing from administration to management. These roles required flexible problem-solving in high-pressure environments and helped cultivate strong communication skills through engagement with varied internal and external stakeholders. My two management positions refined my ability to lead, train and motivate teams.

Career History

Jan 2024 – Present – Watco

Position: Associate Application Developer

- Developed dynamic sales reports using Laravel, SQL Server and Management Studio
- Streamlined data integration workflows from Shopify and the company website into internal reporting and warehouse management systems
